# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US2004/010840

		Box No. I Basis of the report	_
	1. \		_
	_	With regard to the <b>language</b> , this report is based on the international application in the language in which it wa iled; unless otherwise indicated under this item.	38
		<ul> <li>This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of:</li> <li>□ international search (under Rules 12.3 and 23.1(b))</li> <li>□ publication of the international application (under Rule 12.4)</li> <li>□ international preliminary examination (under Rules 55.2 and/or 55.3)</li> </ul>	
	2. V h re	Vith regard to the <b>elements*</b> of the international application, this report is based on (replacement sheets which wave been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this peport as "originally filed" and are not annexed to this report):	h
	D	escription, Pages	
	1-	-20 as originally filed	
	C	laims, Numbers	
	8-	23 as originally filed	
	1-	7 received on 28.02.2005 with letter of 25.02.2005	
	Dı	rawings, Sheets	
	1/1	as originally filed	
		a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing	
3.		The amendments have resulted in the cancellation of:	
		☐ the description, pages ☐ the claims, Nos.	
		$\Box$ the drawings, sheets/figs	
		The sequence listing (specify):	
		any table(s) related to sequence listing (specify):	-
4.	□ had Su	This report has been established as if (some of) the amendments annexed to this report and listed below not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the pplemental Box (Rule 70.2(c)).	
		☐ the description, pages ☐ the claims, Nos. ☐ the drawings, sheets/figs	
		the sequence listing (specify):  any table(s) related to sequence listing (specify):	
	*		
		If item 4 applies, some or all of these sheets may be marked "superseded."	

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US2004/010840

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

D1: US-A-5 573 619 D2: US-A-5 565 049

D3: US-A-4 886 701 D4: US-A-5 626 512

D5: US-A-5 681 361 cited by the applicant

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

The document D5 discloses:

a method of making an abrasive article according to the features of claim 1, especially the use of prebond web is mentioned as well as the use of dry particulate material, see respectively column 4, lines 60 to 63 and lines 46 to 59.

Dependent claims 2 to 23 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step, see documents D1 to D5 and the corresponding passages cited in the search report.

- 1. A method of making an abrasive article, including the steps of
- (i) forming a three-dimensional lofty nonwoven fibrous web contacted with dry particulate material that includes fusible binder particles;
- (ii) exposing the web to conditions that cause the binder particles to form a flowable liquid binder, and then solidifying the liquid binder to form bonds between the fibres of the web and thereby provide a lofty pre-bonded web having more than 50% intercommunicated voids; and
- (iii) applying abrasive particles to the pre-bonded web, and bonding the abrasive particles to the fibres of the pre-bonded web to provide the abrasive article.
- 2. A method as claimed in claim 1, in which step (i) comprises forming fibres into a three-dimensional nonwoven web, and then contacting the web with the dry particulate material.
- 3. A method as claimed in claim 1, in which step (i) comprises mixing fibres with the dry particulate material, and then forming the mixture into a three-dimensional nonwoven web.
- 4. A method as claimed in any one of the preceding claims, in which the fibres of the web comprises synthetic fibres or natural fibres or mixtures thereof.
- 5. A method as claimed in claim 4, in which the fibres of the web comprise polyamide fibres.
- 6. A method as claimed in claim 4, in which the fibres of the web comprises coco, sisal and/or hemp fibres.
- 7. A method as claimed in any one of the proceeding claims, in which the fusible binder particles comprise thermosetting or thermoplastic materials.
